

Call for Tutorial Proposals

The ICGSE 2010 Organizing Committee invites tutorial proposals for the IEEE International Conference on Global Software Engineering (ICGSE) which will take place from August 23-26, 2010, Princeton, NJ, USA.

We invite tutorial proposals that will benefit practitioners and academics who seek to investigate the multi-faceted aspects of Global Software Engineering (GSE). Thus, we encourage tutorial submissions that can develop skills needed to conduct research in the field of ICGSE which draw from multiple fields of study e.g. social, behavioral and human sciences including those typically associated with software engineering, collaborative work and computer-human interaction.

Requirements for Tutorial Proposal Submission

- Objective: Title, expected goals, objectives and motivation of the tutorial.
- Proposal Outline: A detailed outline of the presentation (max 4 pages). Shall include a list of covered topics.
- Instructor qualification: A brief description of the instructor(s) indicating the relevant qualifications and teaching experience.
- Tutorial level: Introductory, Intermediate or Advanced.
- Intended audience: it should be indicated to whom the tutorial is aimed.
- Proposals must be submitted in the MS Word or PDF templates.
- Designed as half-day (four hour) sessions, including break for coffee and lunch.

All submissions will be evaluated by a committee using the following criteria:

- Relevance, interest, and value of the topic to ICGSE attendees.
- Completeness, clarity, and quality of the tutorial proposal.
- Expertise of the presenters in the proposed topic.
- Effectiveness of the proposed presentation approach.

Conference attendees usually consider the reputation of the presenters as one of their criteria for selecting a tutorial. It is expected that the presenters listed in the submitted proposal will be at the conference to present their tutorials. The presenters agree to provide participants with teaching materials that include:

- A detailed outline and explanatory text equivalent to the oral component of the tutorial.
- Copies of the slides in PowerPoint format. Relevant articles or books may be provided as supplementary information but do not replace the text material of the handout. Presenters must obtain the copyright permission for their material.

Ten or more participants must register for the tutorial for it to run.

Submission Details:

Tutorial proposals are due: **February 12th, 2010.**

Submitted to both Rafael Prikladnicki (rafael.prikladnicki@pucls.br) and Ban Al-Ani (balani@ics.uci.edu).

Detailed information regarding the other relevant dates (e.g. date of the notification etc.) will be provided on the web site.
